DIKSHIT JASWAL

Hamirpur, Himachal Pradesh, India | +91-9317084250 | dikshitjaswal1922@gmail.com
Portfolio: portfolio-website-lake-nine-35.vercel.app | LinkedIn: in/dikshit-jaswal-a0172a379 | GitHub: github.com/DikshJaswal

PROFESSIONAL SUMMARY

Final-year Computer Science student and Full-Stack Software Developer with industry internship experience and four production-deployed systems. Experienced in architecting scalable SaaS platforms, distributed synthetic health monitors, and AST execution engines using TypeScript, React, Next.js, Node.js, Express, and cloud databases (TiDB Serverless MySQL, MongoDB Atlas). Demonstrated track record in automated testing, zero-downtime database migrations, and real-time incident alerting pipelines. Seeking an SDE / Full-Stack Developer role.

EDUCATION

Himachal Pradesh Technical University, Hamirpur, India *Expected Graduation: July 2027*
Bachelor of Technology in Computer Science and Engineering **CGPA: 7.26 / 10.0**
Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, System Design.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, SQL, Python, C++, HTML5, CSS3
- **Frontend:** React.js, Next.js 16 (App Router), Vite, Tailwind CSS, Recharts, Framer Motion, Chart.js, Monaco Editor
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT Authentication, Bcrypt, Helmet, Express-Rate-Limit
- **Databases & Cloud:** TiDB Cloud (Serverless MySQL), MongoDB Atlas, PostgreSQL, Prisma ORM, Vercel, Render, Cloudinary
- **DevOps & Testing:** Twilio SendGrid REST API, Twilio SMS, Webhooks, Vitest, Turbopack, Git, GitHub, Postman, Docker

WORK EXPERIENCE

MERN Stack Development Intern *Jun 2026 – Aug 2026*
INPHORA Pvt. Ltd. *Remote / Hamirpur, India*

- Developed full-stack modules for personal finance web applications using React, Node.js, Express, and MongoDB, implementing compound-indexed schemas for fast transaction CRUD and automated monthly budget calculations.
- Engineered responsive telemetry dashboards with Recharts and built secure JWT authentication with client-side CSV statement exports.

FEATURED PROJECTS

CodeFlow — JavaScript Execution Visualizer & AST Step-Debugger *Live Demo | GitHub*
Technologies: Next.js 16, React 19, TypeScript, Tailwind CSS, Turbopack, Vitest, Monaco Editor

- Architected a client-side JavaScript execution engine and step-debugger using AST-based parsing, supporting variable reassignments, compound operators, and object/array mutations with 100% test coverage.
- Engineered a real-time visualizer featuring dynamic call stack frames, synchronized breakpoint controls, adjustable playback speeds (0.5x–2x), and pre-configured algorithmic presets with zero-error static typing.

FinPilot — Personal Finance & Budget Management SaaS *Live Demo | GitHub*
Technologies: React, Node.js, Express, MongoDB Atlas, Recharts, Tailwind CSS, JWT

- Architected a full-stack personal finance application with RESTful APIs supporting transaction CRUD, dynamic monthly budget tracking, and 6-month cashflow analytics using compound-indexed MongoDB queries.
- Engineered responsive telemetry dashboards utilizing Recharts with budget alert thresholds (80% warning, 100% exceeded), 1-click recruiter demo authentication, and client-side CSV statement exports.

RESOLVE — Enterprise IT Helpdesk & SLA Management SaaS *Live Demo | GitHub*
Technologies: React, TypeScript, Node.js, Express, TiDB Cloud Serverless (MySQL), Cloudinary, Tailwind CSS

- Built a full-stack IT service desk platform with granular Role-Based Access Control (Admin, Agent, Customer), conversation threads, attachment handling, and real-time SLA escalation warning timers.
- Migrated database architecture from legacy trial hosting to a scalable TiDB Cloud serverless MySQL cluster; implemented 1-click recruiter demo authentication, rate-limiting security, and an automated end-to-end test suite verifying 19/19 feature flows.

API Sentinel — Synthetic API Health Monitoring & Incident Dispatcher *Live Demo | GitHub*
Technologies: Next.js 16, React 19, TypeScript, Tailwind CSS, Twilio SendGrid, Chart.js, Turbopack

- Architected an automated synthetic monitoring platform that continuously probes microservices across deployed full-stack applications (RESOLVE, FinPilot, CodeFlow), evaluating p95 latencies and SLA uptime scores.
- Engineered an incident notification pipeline integrating Twilio SendGrid (Email) and Twilio SMS over HTTPS REST APIs, featuring state-aware alert deduplication and automated recovery confirmations to eliminate notification fatigue.
